DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-4, 7, 9-17 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,271,532 to Jumel et al.

Jumel shows a fluid dispenser as seen in Fig. 1, having a fixing member 3 for fixing a dispenser member 1 to the neck 7 of reservoir 2, the fixing member has a cylindrical vertical skirt formed by segment 15, 16 and 6 engaging the opening of the reservoir in a leak tight contact, a vent 9 passing through the thickness of the skirt and located at a middle segment 16 below the segment 15 of larger diameter, an abutment flange 12 and a ferrule 4.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 8 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,271,532 to Jumel et al.

Application/Control Number: 10/677,384

Art Unit: 3754

Jumel shows in Fig. 1 all claimed features as discussed above except for a vertical groove communicating with the vent. In Fig. 2 Jumel shows a vent groove 9A communicating with vent 9. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Jumel depicted in Fig. 1 by including a groove as seen in Fig. 2, to assure venting of the air pressure produced inside the container when fitting the pump onto the neck of the container is carried out.

5. Claims 5, 6 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,271,532 to Jumel et al. in view of US 6,349,856 to Chastel.

Jumel shows all claimed features as discussed above except for the fixing member having an outwardly projecting bead. Fuchs shows in Fig. 1, outwardly projecting beads 14 extending from the fixing member 1 and designed to flatten in the opening of the container, see Figs. 2 and 2a. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Jumel to include an outwardly projecting bead to produce a reliable seal and a stable cylindrical assembly as taught by Chastel.

Response to Arguments

6. Applicant's arguments with respect to claims 1, 4-8 and 10-20 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fuchs ('444) shows a dispensing for discharging a fluid. Durliat shows a pump dispenser and method of making the same.

Application/Control Number: 10/677,384

Art Unit: 3754

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin A. Cartagena whose telephone number is (571) 272-4924. The examiner can normally be reached on T-F (7:30AM to 6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
